ENGINEERING AND TECHNOLOGY ENROLLMENTS, FALL 1990

Part I Engineering

Enrollments and Degrees by School and by Curriculum for all Students Including Breakdown by Women, Minorities and Foreign Nationals

[illegible]
[illegible] of Engineering Societies, Inc.

Commissioners of the Engineering Manpower Commission, February 15, 1990

Mr. Peter S. Adams, Consultant
E. I. duPont de Nemours & Co.

Dr. Eleanor Baum, Dean, School of Engineering
Cooper Union

• Dr. Fred Beaufait, Dean, College of Engineering
Wayne State University

Mr. John F. Betsch
Grumman Corporation

Dr. Theodore A. Bickart, Dean of Engineering
Michigan State University

• Dr. William R. Boyle, Vice President/Division Chairman
Oak Ridge Associated Universities

Dr. John A. Brighton, Dean of Engineering
Pennsylvania State University

Mr. Donald C. Brown, Consultant
(Retired, Sun Company/Oryx)

Mr. Kenneth R. Dede, Manager, Personnel Relations/Research
Eastman Kodak Company

• Mr. Edward J. Doyle, Consultant
(Retired, New Jersey Bell)

• Ms. Patricia L. Eng, Project Manager
Nuclear Regulatory Commission

Mr. Irwin S. Ginsburg, Human Resources Consultant
Amoco Corporation

Mr. Earl E. Gottsman, Vice President for Academic Affairs
Capitol College

• Mr. Dwight Gourneau, Senior Engineer
IBM Corporation

• Mr. Lewis G. Grimm, Associate Vice President
Frederic R. Harris Inc.

Mr. John Hannabach, Director, Corporate Relations/Placement
Georgia Institute of Technology

Mr. David A. Kearney, Manager, Graduate Employment
Westinghouse Electric Corporation

Dr. William K. LeBold, Director, Educational Research
Purdue University

• Dr. Charles S. Lessard, Associate Professor, Bioengineering
Texas A&M University

• Mr. Daniel J. McGinley, Director of Curricula & Accreditation
American Society of Civil Engineers

Miss Barbara A. Montague, Consultant
E. I. duPont de Nemours & Co.

Dr. David R. Reyes-Guerra, Executive Director
Accreditation Board for Engineering & Technology

• Mr. Michael B. Rubin, Mechanical Engineer
David Taylor Research Center, U.S. Navy

Mr. Robert Rusek, Division Manager, Compensation
AT&T/Corporate

Dr. William M. Sangster, Dean, College of Engineering
Georgia Institute of Technology

Mr. Fred O. Schultz, Jr., Recruiting Head, R & D
Procter & Gamble Company

• Mr. Glenn J. Snyder, P.E., Consultant, SM/MS Inc.
(Retired, B & W Co.—Nuclear Technologies)

Mr. John F. Spencer, Manager, Engineering Management Services
Port Authority of New York & New Jersey

• Mr. James Donald Strong, Consultant
(Retired, U.S. Army/NSPE)

Mr. Neal C. Thompson, Senior Staff Compensation Specialist
Exxon Research & Engineering

• Dr. Anthony L. Tilmans, President
Kansas College of Technology

Mr. Stephen B. Tucker, Program Manager, Recruiting
General Electric Corporation

Dr. John F. Van Domelen, President
Wentworth Institute of Technology

Dr. Glen Vanden Berg, Agricultural Project Coordinator
Beltsville Agricultural Research Center, USDA

Dr. M. Lucius Walker, Jr., Dean of Engineering
Howard University

Mr. Alan D. Wolfson, Director, Executive Resources
IBM Corporation

• Ms. Mary Ann Zimmerman, Consultant
TransCentury Corporation

• Represents AAES member society

SUSTAINING/CONTRIBUTING ASSOCIATES:
(Additional institutions are expected to be added to this list throughout the year.)

Patron Sustaining Associates:
General Electric Foundation
National Action Council for Minorities in Engineering

Senior Sustaining Associates:
Amoco Foundation

Sustaining Associates:
American Institute of Chemical Engineers
AT&T
Eastman Kodak Company
E. I. duPont de Nemours & Company
Exxon
Procter & Gamble Company
Society of Petroleum Engineers
Westinghouse Electric Corporation

Contributing Associates:
Deere & Company
Grumman Corporation
National Society of Professional Engineers
Society for Mining, Metallurgy, and Exploration, Inc.

ENGINEERING AND TECHNOLOGY ENROLLMENTS FALL 1990

PART I - ENGINEERING

Enrollments by School and Curriculum for All Students,
Including Breakdowns for Women, Minorities, and Foreign Nationals

A Report of an Annual Survey
Conducted by the

ENGINEERING MANPOWER COMMISSION
of the
AMERICAN ASSOCIATION OF ENGINEERING SOCIETIES, INC.

1111 Nineteenth Street, N.W.
Washington, D.C. 20036-3690

© 1991 by the American Association of Engineering Societies, Inc. As it is the objective of AAES publications to be a forum for the free expression and interchange of ideas, the opinions, positions, and research stated in published works are those of the original researchers and authors and not by the fact of publication necessarily those of the American Association of Engineering Societies, Inc., or related bodies. Contributing researchers and authors are requested and expected to disclose any financial, economic, or professional interests or affiliations that may have influenced positions taken or advocated in these materials.

ISBN # 0-87615-193-4

AMERICAN ASSOCIATION OF ENGINEERING SOCIETIES

The American Association of Engineering Societies (AAES) is a multidisciplinary organization dedicated to advancing the knowledge, understanding and practice of engineering in the public interest. Its members represent the mainstream of U.S. engineering--over half a million engineers in industry, government, and education.

Through its councils, commissions and committees, AAES addresses questions relating to the engineering profession; assesses public policy issues affecting engineering, technological innovation and national goals; conducts surveys of engineering personnel; represents the U.S. engineering community internationally in such bodies as the World Federation of Engineering Organizations and the Pan American Union of Engineering Associations; undertakes special projects such as national inventors' workshops and major studies of the utilization of American engineers; issues statistical studies of the engineering workforce, present and future; and publishes reference works such as *Who's Who in Engineering* and the *Thesaurus of Engineering and Scientific Terms.*

AAES also conducts forums for leaders in engineering, industry, government and education for the discussion of issues affecting engineering and the public interest. These include annual leadership conferences, workshops on technology forecasting and assessment, public policy roundtables, and engineering executive forums.

1991 Officers

Albert Grant, Chairman, Board of Governors
Carleton Bayless, Chairman-Elect
Lawrence P. Grayson, Past Chairman
Ernest Daman, Secretary/Treasurer
Michell H. Bradley, Executive Director

ENGINEERING MANPOWER COMMISSION

The Engineering Manpower Commission (EMC) has been a source of objective, timely data on questions relating to the supply and demand for technological personnel since its organization in 1950. As an AAES Commission, EMC is composed of volunteers from professional engineering societies, academia, government, and industry, supported by a professional staff headed by AAES' Director of Manpower Studies.

EMC conducts annual surveys of industry and schools of engineering, monitors trends in the supply of and demand for engineers, and produces annual reports on engineering enrollments, degrees, and salaries. In addition to its statistical studies, EMC also produces the *Engineering Manpower Bulletin*, which assesses trends in the engineering workforce including participation in the profession by women and ethnic minorities.

1991 Officers

Donald C. Brown, Chair
Dr. William M. Sangster, Vice Chair
Dr. Fred Beaufait, Vice Chair, and Chair, Education Committee
Dr. Glen Vanden Berg, Chair, Enrollments Committee

AAES Staff

Director, Manpower Studies: R. A. Ellis
Director of Publications: Gordon Davis
Education Survey Manager: Diane Shinberg

The Engineering Manpower Commission wishes to express its grateful appreciation for the cooperation of the hundreds of organizations that provided the data on which this report is based.

Combined Summaries 355

INTRODUCTION TO VOLUME I

This is the 23rd annual report from the Engineering Manpower Commission (EMC) on enrollments in engineering and engineering technology in the United States. Volume I of the study covers engineering; Volume II covers engineering technology. All data are for enrollment as of Fall, 1990.

Volume I provides detailed data on enrollment in engineering programs for all students and for women, African Americans, Hispanic Americans, Native Americans, Asian Americans, and foreign nationals. Enrollment is tabulated by the year in school—first year, second year, etc.—for full-time undergraduates, and by the type of degree sought—master's and professional engineering, or doctorate—for full-time graduate students. Part-time students are tabulated separately at the undergraduate and graduate levels, irrespective of their year in school or of the type of advanced degree they are seeking. Note that schools showing no data for particular full-time students may still have such students attending part-time. Two basic types of tabulations are provided, in addition to summary tables. The first summarizes overall enrollment, across all curricula, for each school covered in this report. Schools are listed alphabetically within states; state subtotals and grand totals are included. These data provide basic institutional and geographic measures of participation in engineering programs.

The second general type of tabulation provides detailed enrollment data for each engineering program offered by these schools. Programs are listed within some twenty broad engineering disciplines (e.g., chemical, civil, etc.); disciplinary subtotals are provided both within these listings and in separate summary tables. Within each broad discipline, programs are listed alphabetically by their detailed titles, within schools and states, thus preserving such distinctions as the differences between programs in general civil engineering, surveying engineering, and transportation engineering. Using these tables, readers can obtain information on enrollment in specialized fields of engineering that are not isolated in the broader disciplinary groups, such as manufacturing engineering.

Like all of EMC's surveys of engineering enrollments and degrees since 1986, all tabulations in this report draw on a master data base on engineering programs, in order to provide accurate, consistent descriptive data. EMC's educational surveys also use the data base to generate the survey forms used to obtain these statistics. Participating institutions receive laser-generated questionnaires that include the specific programs and other descriptive data applicable to a particular engineering school. This simplifies data entry for all parties and improves the consistency and accuracy of the work.

Major efforts are made in these studies to obtain full cooperation from participating schools. In addition, when partial responses are possible—for example, some schools cannot report the numbers of women who are enrolled in each specific combination of engineering program and year in school, but can report how many women are enrolled in each program, overall—then the overall data are pro-rated to generate reasonable approximations for data entry. As a result of these steps, the incidence of missing information in EMC's educational surveys has been greatly reduced. Consequently, these studies no longer use the estimates of missing data that appeared in our reports on enrollments and degrees before 1986. In addition, detailed codes are employed to report the precise adjustments used to deal with every response (see the description of the "T-A-R" codes, below).

Detailed commentary on the results of the survey of Fall, 1990 engineering enrollments will be issued simultaneously with these reports in issue No. 108 of EMC's *Engineering Manpower Bulletin*. We will take note of the following outcomes, however. Overall the number of full-time undergraduate engineering students was similar to last year, and full-time graduate enrollments increased 5.1 percent. Enrollments for ethnic minority groups, women and foreign nationals increased overall. First-year enrollments declined but not as much as had been expected (1.1 percent), and the numbers and percentage shares of women, ethnic minority and foreign national students increased.

Our 1990 engineering enrollment survey is also available in the form of machine-readable files on IBM-format 5 1/4 or 3 1/2 inch floppy disks configured for use with Lotus Development Corporation's 1-2-3 spreadsheet software. These files include detailed results from newly added data on the sex of ethnic minority and foreign national students at each school. A national summary of this additional information, which was suggested by the Engineering Deans' Council and NACME, is printed in this introduction.

Any questions regarding the course content or other details of specific engineering programs should be directed to the participating schools. Other inquiries about EMC's educational surveys are welcome. Contact R. A. Ellis, Director of Manpower Studies, American Association of Engineering Societies.

COVERAGE

In engineering, the 1990 enrollment study covers 328 institutions, including all of those with curricula approved by the Accreditation Board for Engineering and Technology (ABET); in addition, Grand Valley State University in Michigan and the University of California at Santa Cruz are known to be operating, but neither participated in this year's survey and no past enrollment data is available for substitution. Some of these programs are newly initiated and

have not been included in previous reports from EMC. Engineering enrollments are reported here for the first time for Alabama A&M Univeristy, the University of Denver in Colorado, the College of Polymer Science at the University of Akron in Ohio, and Hampton University and Norfolk State University in Virginia. There were a number of name changes at the request of the participating institutions. These listings provide a comprehensive enumeration of enrollment in engineering programs available in the United States today.

In counting institutions, EMC abides by local preferences in deciding whether or not to count a school's branches as separate entities. Thus all of the various locations of the Pennsylvania State University are counted as a single institution, while in other cases (for example, Purdue and the University of Texas), some branches are treated as separate schools. This treatment is a continuation of EMC's traditional practices.

SUBSTITUTED DATA

As in the past, data for some institutions were obtained by substituting an earlier response for missing reports. Substitutions are permitted because problems caused principally by personnel turnover make it unreasonable to expect complete participation every year by every school. In a change from previous EMC practice that was first adopted in 1987, we are now using responses for any previous year rather than drop a school from coverage. The older substitutions are used only when extended efforts have failed to yield a current response; schools handled in this fashion for the 1990 survey are identified below. In a number of cases, the substituted data applies only to a portion of an institution's response; for example, undergraduate data may have been covered with a fresh 1990 response, while graduate programs were substituted with older data. All substitutions are identified in the body of the report by appropriate "T-A-R" codes (see below). Except where noted, all substituted schools used Fall, 1989 data.

Arkansas State University
Northop University (California)
United States Naval Postgraduate School (California)
Hartford Graduate Center (Connecticut)
University of Bridgeport (Connecticut)
University of Hartford (Connecticut), 1985

ERROR CHECKING

Thorough efforts were made to eliminate errors in statistics. Literal comparisons between original data and key entries were carried out. Totals for every combination of enrollment level and school were checked against original questionnaires. Results for each school were compared with reports for previous years, to check for questionable shifts in the results from one year to the next, or missing information on particular programs. The additional totals by sex for all students, ethnic minority students and foreign national students which most schools provided were used as another check of both the data entry and the actual data provided by the schools. Instances of both sorts of problems were found and fixed; in some cases, reporting errors on the part of participating institutions were identified, while in others some significant shifts in patterns of engineering enrollment were confirmed.

Program-level ABET accreditation codes were updated for this study. Note that EMC's program-level accreditation codes reflect only ABET certifications, and do not allow for program-level approvals from the new accreditation board for computer and information science.

EXPLANATION OF SYMBOLS AND ABBREVIATIONS

The "T-A-R" Codes:

The enrollment survey uses a three-position alphabetical coding system to denote school types, institutional-level accreditation, and (if applicable) special conditions that explain a school's response to the survey. These codes are constructed as follows:

T: Type of School:

"S" means state or other public control, including municipally-sponsored schools, but excluding the federal service academies.

"F" denotes the federally-sponsored schools.

"N" means non-sectarian, non-profit private institutions.

"R" denotes religiously affiliated private institutions.

"P" denotes proprietary schools.

"C" denotes combined public and private sponsorship, e.g. Cornell University.

A: Accreditation:

"B" means that the school has ABET-approved courses in both engineering and technology.

"E" means at least one engineering program is accredited by ABET.

"R" means the school does not have ABET-accredited courses but is approved at the institutional level by regional accreditation agencies like the Southern Association of Colleges and Schools.

"T" means that at least one technology program is accredited by ABET.

R: Response:

These codes appear only when applicable; they are not necessarily identical to the similar codes used in the survey of 1989 enrollment. Codes are listed here in alphabetical order.

"A" means that all details (women, minorities, and foreign nationals enrolled in engineering programs) are missing from the response. There may be such students at the school but they will not show up in the tabulations for the specific population groups. The numbers for all enrolled students are not affected.

"B" means that details were provided for women only; details for minorities and for foreign nationals were not provided.

"C" means that details were provided for women and minorities only; details for foreign nationals were not provided.

"E" means that details were provided for women and foreign nationals; details for the minority groups were missing.

"F" means that details were provided for some, but not all, of the minority groups and foreign nationals; that is, some minority/foreign national data were missing.

"G" means that part-time enrollment was not separated from full-time enrollment.

"H" means that part-time enrollment was not separated from full-time enrollment, and some details were missing.

"I" means that details for part-time students are included in full-time details.

"J" means that details for part-time students were not available.

"K" means that some or all details for full-time Ph.D. students were unavailable.

"N" means that all students were listed under part-time; details by year and distinctions between part-time and full-time students were unavailable.

"O" means that part-time students were not separated from full-time students, and data pro-rated by EMC in some fashion.

"P" means that some data were developed by EMC, by pro-rating accurate aggregates (such as information on all women students) among the various programs at a school.

"Q" means that some data were pro-rated by EMC, and foreign national data were missing altogether.

"R" means that some students were counted twice by the institution as both full-time master's and full-time doctorate students. (This response code pertains to Washington University only.)

"V" means that students reported as fifth year are cooperative students and no details are available for them. (This response code pertains to Georgia Institute of Technology only.)

"9" denotes a substituted response using data originally submitted for Fall, 1989. Eighteen engineering schools were treated with such data.

"8" denotes a substituted response using data originally submitted for Fall, 1988. One level at one institution was handled with this older data.

"5" denotes a substituted response using data orginally submitted in 1985. The code pertains to the engineering programs at the University of Hartford in Connecticut.

Examples: "TAR" code of SB: this is a publicly supported school with ABET-approved programs in both engineering and engineering technology. "TAR" code of RR9: this is a religious-affiliated school, regionally accredited, which has been handled with a substituted 1989 response. "TAR" code of NEB: this is a private, non-sectarian school with ABET-accredited engineering programs and missing details for minorities and foreign nationals.

Program-Level Accreditation Codes:

These are used only in the tabulations for specific curricula:

"A" denotes ABET accreditation at the associate degree level.

"B" denotes ABET accreditation for the program at the bachelor's level.

"M" denotes ABET accreditation at the master's level (now only rarely used for programs with no B.S. equivalent).

"N" denotes programs with no ABET accreditation. In general, where program titles match across degree levels, higher-level offerings will be flagged with the corresponding lower-level code if such an ABET certification exists. However, many situations exist where this rule cannot be unambiguously applied. For example, we have generally labeled master's level programs in engineering mechanics as "N" for "no ABET accreditation" even when an ABET-approved BS curriculum in mechanical engineering is offered. If an undergraduate program in engineering mechanics existed, then a "B" code would have been used for any corresponding higher-level program. In general, ABET does not attempt to accredit graduate programs, and codes at this level (other than the rare "M" designations) are meant only to denote the existence in an institution of an ABET-approved undergraduate course with an identical designation.

Engineering Discipline Category Abbreviations:

AER = Aerospace and Related
AGR = Agricultural
ARC = Architectural
BIO = Bioengineering
CER = Ceramics
CHE = Chemical
CVL = Civil and Construction
CMP = Computer
ELC = Electrical and Electronic
ENS = Engineering Science
ENV = Environmental
GNL = General Engineering
INM = Industrial/Manufacturing/Engineering Management
MAR = Marine
MTL = Materials and Metallurgical
MEC = Mechanical
MGN = Mining/Mineral/Geological
NUC = Nuclear
PET = Petroleum and Natural Gas
SYS = Systems
OTH = Others
PRE = Undeclared majors, or other "freshman engineering" students

The University of Utah has reported students enrolled in a three tier system: Pre-Engineering, Intermediate Engineering, and Engineering. Intermediate Engineering, as a probationary level before admittance to a full-fledged engineering discipline, is categorized by EMC as PRE.

MISCELLANEOUS NOTES

First-year enrollments are incompletely covered in these surveys, for a variety of reasons, including the fact that at many schools first-year students cannot declare a major field. The under-enumeration is consistent from one year to the next, so EMC's first-year time series data are reliable as an indicator of trends, even though they fall considerably short of a total enumeration.

In 1987, EMC stopped its partial coverage of enrollment in pre-engineering or other two-year transfer programs in community or junior colleges; it also dropped coverage of "3-2" transfer programs in four-year colleges that not do have their own engineering degrees.

Women reported include minorities and foreign nationals. Ethnic minorities are limited to U.S. citizens or other permanent residents. "Foreign Nationals" are students in the United States on F-1 (student) or J-1 (exchange) visas, and exclude immigrants or other permanent residents. This year EMC requested, at the degree level but not at the program level, the number of ethnic minority and foreign national students by sex. Most institutions provided this information; others had difficulty providing data at this level of detail. The results at the national level are summarized in a table in this introduction. As noted above, the detailed results are included on our machine-readable floppy disks. For ordering information, see inside back cover.

CURRENT ENGINEERING MANPOWER COMMISSION PUBLICATIONS

NOTE: AAES has moved; see new address below. Custom runs of degree data are possible; call us for details. Our machine-readable products are provided on IBM-standard 5 1/4" floppy disks and include most, not but all, of the details available in EMC's printed reports. For more information, contact the AAES Manpower Studies Department.

ENGINEERS' SALARIES: SPECIAL INDUSTRY REPORT 1991 (forthcoming June 1991)

A detailed breakdown of engineering salaries according to type of industry, geographic regions, company size, employee experience, highest degree held, and supervisory status. Tables and graphs depict salaries in medians, quartiles, deciles and means.

member price: $169.00 non-member price: $287.50

PROFESSIONAL INCOME OF ENGINEERS 1991 (forthcoming June 1991)

An abridged version of the Special Industry Report. Details for salary differences by highest degree held are not included; tabulations are added on engineering compensation in local, state and federal government agencies.

member price: $59.50 non-member price: $97.00

SALARIES OF ENGINEERS IN EDUCATION 1990

Median, quartile, decile and mean salaries across 18 experience brackets for engineering faculty, by academic rank, contract types, and type of institution.

member price: $70.00 non-member price: $112.00

ENGINEERING AND TECHNOLOGY ENROLLMENTS, FALL 1990

A two-volume overview of the enrollment of students in engineering and engineering technology programs throughout the nation. Details by fields of study for specific schools and states, with added tabulations for women, minorities, and foreign nationals.

Complete set: member price: $120.00 non-member price $195.00

Separate volumes:

Part I: Engineering Enrollments: member price: $70.00 non-member price: $115.00

Part II: Technology Enrollments: member price: $70.00 non-member price: $115.00

Machine-readable data files for Lotus 1-2-3: member price $595.00 non-member price $795.00

ENGINEERING AND TECHNOLOGY DEGREES, 1990

A comprehensive report on recent engineering and engineering technology degrees in three volumes. Part I provides general statistics for schools and states on degrees in 40 engineering and technology disciplines. Part II provides similar data for awards to women, minorities, and foreign nationals. Part III includes detailed data for specific curricula.

Complete Set: member price: $140 non-member price: $230.00

Separate volumes:

Part I: by School: member price: $55.00 non-member price: $89.00

Part II: Minorities: member price: $75.00 non-member price: $115.00

Part III: by Curriculum: member price: $55.00 non-member price: $89.00

Machine-readable data files for Lotus 1-2-3: member price $595.00 non-member price $795.00

ENGINEERING MANPOWER BULLETINS

Concise, timely information on trends in engineering salaries, enrollments, degrees, women and minorities in engineering, other topics.

Full subscription year: member price: $66.00 non-member price: $110.00

Single copies: member price: $9.00 non-member price: $14.00

TO ORDER:

Member prices are available to members of AAES member societies, employees of Industry Affiliates, and educational institutions or firms that have participated in the study to be purchased. Special prices are available to subsidiaries and employees of EMC Sustaining Associates. Please include society affiliation and membership number, Industry Affiliate, EMC Sustaining Associate, or survey participant information with your order, if applicable. First class postage (U.S. domestic) is included in the purchase price. Foreign orders add 10%; check must be payable in U.S. funds. Institutional purchase orders are accepted, as are Visa and MasterCard charges (include account number, expiration date and signature). Orders charged to Visa and MasterCard accounts may be placed directly by phone (U.S. only) at 1-800-658-8897. Mail orders should be directed to the AAES Publications Department, Suite 608, 1111 19th St. N.W., Washington, D.C. 20036-3690.

AD885-2.2U

ENGINEERING AND TECHNOLOGY ENROLLMENTS, FALL 1990

Part II - Technology

Technology enrollments by school and by curriculum for all students including a breakdown by women and minorities.

Commissioners of the Engineering Manpower Commission, February 15, 1990

Mr. Peter S. Adams, Consultant
E. I. duPont de Nemours & Co.

Dr. Eleanor Baum, Dean, School of Engineering
Cooper Union

• Dr. Fred Beaufait, Dean, College of Engineering
Wayne State University

Mr. John F. Betsch
Grumman Corporation

Dr. Theodore A. Bickart, Dean of Engineering
Michigan State University

• Dr. William R. Boyle, Vice President/Division Chairman
Oak Ridge Associated Universities

Dr. John A. Brighton, Dean of Engineering
Pennsylvania State University

Mr. Donald C. Brown, Consultant
(Retired, Sun Company/Oryx)

Mr. Kenneth R. Dede, Manager, Personnel Relations/Research
Eastman Kodak Company

• Mr. Edward J. Doyle, Consultant
(Retired, New Jersey Bell)

• Ms. Patricia L. Eng, Project Manager
Nuclear Regulatory Commission

Mr. Irwin S. Ginsburg, Human Resources Consultant
Amoco Corporation

Mr. Earl E. Gottsman, Vice President for Academic Affairs
Capitol College

• Mr. Dwight Gourneau, Senior Engineer
IBM Corporation

• Mr. Lewis G. Grimm, Associate Vice President
Frederic R. Harris Inc.

Mr. John Hannabach, Director, Corporate Relations/Placement
Georgia Institute of Technology

Mr. David A. Kearney, Manager, Graduate Employment
Westinghouse Electric Corporation

Dr. William K. LeBold, Director, Educational Research
Purdue University

• Dr. Charles S. Lessard, Associate Professor, Bioengineering
Texas A&M University

• Mr. Daniel J. McGinley, Director of Curricula & Accreditation
American Society of Civil Engineers

Miss Barbara A. Montague, Consultant
E. I. duPont de Nemours & Co.

Dr. David R. Reyes-Guerra, Executive Director
Accreditation Board for Engineering & Technology

• Mr. Michael B. Rubin, Mechanical Engineer
David Taylor Research Center, U.S. Navy

Mr. Robert Rusek, Division Manager, Compensation
AT&T/Corporate

Dr. William M. Sangster, Dean, College of Engineering
Georgia Institute of Technology

Mr. Fred O. Schultz, Jr., Recruiting Head, R & D
Procter & Gamble Company

• Mr. Glenn J. Snyder, P.E., Consultant, SM/MS Inc.
(Retired, B & W Co.—Nuclear Technologies)

Mr. John F. Spencer, Manager, Engineering Management Services
Port Authority of New York & New Jersey

• Mr. James Donald Strong, Consultant
(Retired, U.S. Army/NSPE)

Mr. Neal C. Thompson, Senior Staff Compensation Specialist
Exxon Research & Engineering

• Dr. Anthony L. Tilmans, President
Kansas College of Technology

Mr. Stephen B. Tucker, Program Manager, Recruiting
General Electric Corporation

Dr. John F. Van Domelen, President
Wentworth Institute of Technology

Dr. Glen Vanden Berg, Agricultural Project Coordinator
Beltsville Agricultural Research Center, USDA

Dr. M. Lucius Walker, Jr., Dean of Engineering
Howard University

Mr. Alan D. Wolfson, Director, Executive Resources
IBM Corporation

• Ms. Mary Ann Zimmerman, Consultant
TransCentury Corporation

• Represents AAES member society

SUSTAINING/CONTRIBUTING ASSOCIATES:

(Additional institutions are expected to be added to this list throughout the year.)

Patron Sustaining Associates:
- General Electric Foundation
- National Action Council for Minorities in Engineering

Senior Sustaining Associates:
- Amoco Foundation

Sustaining Associates:
- American Institute of Chemical Engineers
- AT&T
- Eastman Kodak Company
- E. I. duPont de Nemours & Company
- Exxon
- Procter & Gamble Company
- Society of Petroleum Engineers
- Westinghouse Electric Corporation

Contributing Associates:
- Deere & Company
- Grumman Corporation
- National Society of Professional Engineers
- Society for Mining, Metallurgy, and Exploration, Inc.

ENGINEERING AND TECHNOLOGY ENROLLMENTS
FALL 1990

PART II - TECHNOLOGY

Engineering Technology Enrollments by School and Curriculum
for All Students, Including Breakdowns for Women and Minorities

A Report of an Annual Survey
Conducted by the

ENGINEERING MANPOWER COMMISSION
of the
AMERICAN ASSOCIATION OF ENGINEERING SOCIETIES, INC.

1111 Nineteenth Street, N.W.
Washington, D.C. 20036-3690

© 1991 by the American Association of Engineering Societies, Inc. As it is the objective of AAES publications to be a forum for the free expression and interchange of ideas, the opinions, positions, and research stated in published works are those of the original researchers and authors and not by the fact of publication necessarily those of the American Association of Engineering Societies, Inc., or related bodies. Contributing researchers and authors are requested and expected to disclose any financial, economic, or professional interests or affiliations that may have influenced positions taken or advocated in these materials.

ISBN # 0-87615-186-1

AMERICAN ASSOCIATION OF ENGINEERING SOCIETIES

The American Association of Engineering Societies (AAES) is a multidisciplinary organization dedicated to advancing the knowledge, understanding and practice of engineering in the public interest. Its members represent the mainstream of U.S. engineering--over half a million engineers in industry, government, and education.

Through its councils, commissions and committees, AAES addresses questions relating to the engineering profession; assesses public policy issues affecting engineering, technological innovation and national goals; conducts surveys of engineering personnel; represents the U.S. engineering community internationally in such bodies as the World Federation of Engineering Organizations and the Pan American Union of Engineering Associations; undertakes special projects such as national inventors' workshops and major studies of the utilization of American engineers; issues statistical studies of the engineering workforce, present and future; and publishes reference works such as *Who's Who in Engineering* and the *Thesaurus of Engineering and Scientific Terms.*

AAES also conducts forums for leaders in engineering, industry, government and education for the discussion of issues affecting engineering and the public interest. These include annual leadership conferences, workshops on technology forecasting and assessment, public policy roundtables, and engineering executive forums.

1991 Officers

Albert Grant, Chairman, Board of Governors
Carleton Bayless, Chairman-Elect
Lawrence P. Grayson, Past Chairman
Ernest Daman, Secretary/Treasurer
Michell H. Bradley, Executive Director

ENGINEERING MANPOWER COMMISSION

The Engineering Manpower Commission (EMC) has been a source of objective, timely data on questions relating to the supply and demand for technological personnel since its organization in 1950. As an AAES Commission, EMC is composed of volunteers from professional engineering societies, academia, government, and industry, supported by a professional staff headed by AAES' Director of Manpower Studies.

EMC conducts annual surveys of industry and schools of engineering, monitors trends in the supply of and demand for engineers, and produces annual reports on engineering enrollments, degrees, and salaries. In addition to its statistical studies, EMC also produces the *Engineering Manpower Bulletin,* which assesses trends in the engineering workforce including participation in the profession by women and ethnic minorities.

1991 Officers

Donald C. Brown, Chair
Dr. William M. Sangster, Vice Chair
Dr. Fred Beaufait, Vice Chair, and Chair, Education Committee
Dr. Glen Vanden Berg, Chair, Enrollments Committee

AAES Staff

Director, Manpower Studies: R. A. Ellis
Director of Publications: Gordon Davis
Education Survey Manager: Diane Shinberg

The Engineering Manpower Commission wishes to express its grateful appreciation for the cooperation of the hundreds of organizations that provided the data on which this report is based.

Combined Summaries 197

INTRODUCTION TO VOLUME II

This is the 23rd annual report from the Engineering Manpower Commission (EMC) on enrollments in engineering and engineering technology in the United States. Volume I of the study covers engineering; Volume II covers engineering technology. All data are for enrollment as of Fall, 1990.

Volume II provides detailed data on enrollment in engineering technology programs for all students and for women, African Americans, Hispanic Americans, Native Americans, and Asian Americans. (A sixth group, foreign nationals, is also tracked in EMC's surveys of engineering enrollments, but is not treated in reports on engineering technology.) Enrollment is tabulated by the year in school—first year, second year, etc.—for all full-time students; in addition, the tables include data on the enrollment of post-baccalaureate students. Part-time students are tabulated separately, irrespective of their year in school.

As in the 1988 and 1989 enrollment surveys, EMC has returned to an older format for the presentation of these data, combining information for both associate and bachelor-level programs in the same tabulations. Virtually no data have been suppressed (we no longer distinguish between third and fourth-or-later year enrollments in associate programs). This supports more efficient packaging of the data and facilitates the identification of schools that offer both types of programs. Such institutions do not adhere to a uniform set of conventions in classifying their students; some prefer to treat all first and second year students as associate degree candidates, and all third-or-higher year students as bachelor degree candidates. In such cases no first or second year enrollments are reported for the bachelor's programs. Other schools report first and second year enrollments for both types of programs.

Two basic types of tabulations are provided, in addition to summary tables. The first summarizes overall enrollment, across all curricula, for each school covered in this report. Schools are listed alphabetically within states; state subtotals and grand totals are included. These data provide basic institutional and geographic measures of participation in engineering technology programs.

The second general type of tabulation provides detailed enrollment data for each technology program offered by these schools. Programs are listed within some twenty broad engineering technology disciplines (e.g., chemical, civil, etc.); disciplinary subtotals are provided both within these listings and in separate summary tables. Within each broad discipline, programs are listed alphabetically by their detailed titles, within schools and states, thus preserving such distinctions as the differences between programs in civil engineering technology and surveying engineering technology.

Like all of EMC's surveys of engineering and engineering technology enrollments and degrees since 1986, all tabulations in this report draw on a master data base on engineering and engineering technology programs, in order to provide accurate, consistent descriptive data. EMC's educational surveys also use the data base to generate the survey forms used to obtain these statistics. Participating institutions receive laser-generated questionnaires that include the specific programs and other descriptive data applicable to a particular school. This simplifies data entry for all parties and improves the consistency and accuracy of the work.

Another important shift in 1987 was the decision to cover *all* schools with one or more programs approved by the Accreditation Board for Engineering and Technology (ABET). This provides improved consistency for time series data. EMC has never attempted to provide comprehensive coverage of all engineering technology programs, because unaccredited courses are offered at hundreds of community and junior colleges not ordinarily covered in the Commission's surveys, and there are inconsistencies from one school to the next (and even from one year to the next within particular schools) in judging just what should or should not be reported as an engineering technology program (indeed, EMC's own criteria have changed over the years). These kinds of inconsistencies have undercut time series comparisons, which are a major objective of these surveys. Strict coverage of the institutions with ABET-approved programs will help to improve this situation. The Commission continues to solicit additional responses from schools without ABET-approved technology programs, but we do not claim to provide comprehensive treatment of them.

Major efforts are made in these studies to obtain full cooperation from the participating institutions. In the case of schools with ABET-approved programs, a response for a previous year will be substituted if no current data has been provided, rather than drop the school altogether. In addition, when partial responses are provided—for example, some schools cannot report the numbers of women who areenrolled in every specific combination of programs and years in school, but can report how many women are enrolled in each program, overall—then the overall data are pro-rated to generate reasonable approximations for data entry. In addition, detailed codes are employed to report the precise adjustments used to deal with every response (see comments on "T-A-R" codes, below).

Detailed commentary on the results of the survey of Fall, 1990 engineering and engineering technology enrollments will be issued simultaneously with these reports in issue No. 108 of EMC's *Engineering Manpower Bulletin*. Results of this survey are also available in machine-readable form on IBM 3 1/2 or 5 1/4 inch floppy disks. These disks also include added data on the sex of ethnic minority and foreign national students. A summary table of enrollment at the national level for population groups by sex appears in this introduction. For ordering information, see the inside back cover.

FALL ENROLLMENTS IN ENGINEERING TECHNOLOGY, 1982-1990

	1982	1983	1984	1985	1986	1987	1988	1989	1990
I. ALL PROGRAMS:									
FULL TIME STUDENTS									
First Year, Associate and Bachelor	59,339	53,032	46,806	34,389	39,177	32,685	33,477	32,225	30,178

NUMBER OF SCHOOLS:	154	161	161	157	185	196	204	205	208

Any questions regarding the course content or other details of specific engineering programs should be directed to the participating schools. Other inquiries about EMC's educational surveys are welcome. Contact R. A. Ellis, Director of Manpower Studies, American Association of Engineering Societies.

COVERAGE AND QUALITY CONTROLS

In engineering technology, the 1990 enrollment study covers 303 institutions, including all of those with curricula approved by ABET. In counting institutions, EMC abides by local preferences in deciding whether or not to count a school's branches as separate entities. Thus all of the various locations of the Pennsylvania State University are counted as a single institution, while in other cases branches may be treated as separate schools.

Engineering technology enrollments for ABET-accredited programs are reported here for the first time for Chattahoochee Technical Institute in Georgia, San Juan College in New Mexico, American Technical Institute in Tennessee, and Midwestern State University and Prairie View A&M University in Texas.

Thorough efforts were made to eliminate errors in these statistics. Literal comparisons between original data and key entries were carried out. Totals for every combination of enrollment level and school were checked against original questionnaires. Results for each school were compared with reports for previous years, to check for questionable shifts in the results from one year to the next, or missing information on particular programs. The new reportage of totals for all groups by sex provided an additional check of both the data entry and the actual data submitted by the institutions.

SUBSTITUTED DATA

The following ABET-accreditted institutions did not submit current enrollment data to EMC for 1990. Fall 1989 enrollment data were substituted in place of more current data. In two cases, Spring Garden College and Horry-Georgetown Technical College, 1988 data were substituted because no more recent data were provided to EMC.

University of Wisconsin at Parkside

EXPLANATION OF SYMBOLS AND ABBREVIATIONS

The "T-A-R" Codes:

The enrollment survey uses a three-position alphabetical coding system to denote school types, institutional-level accreditation, and (if applicable) special conditions that explain a school's response to the survey. These codes are constructed as follows:

T: Type of School:

"S" means state or other public control, including municipally-sponsored schools, but excluding the federal service academies.

"F" denotes the federally-sponsored schools.

"N" means non-sectarian, non-profit private institutions.

"R" denotes religiously affiliated private institutions.

"P" denotes proprietary schools.

A: Accreditation:

"B" means that the school has ABET-approved courses in both engineering and technology.

"E" means at least one engineering program is accredited by ABET.

"R" means the school does not have ABET-accredited courses but is approved at the institutional level by regional accreditation agencies like the Southern Association of Colleges and Schools.

"T" means that at least one technology program is accredited by ABET.

R: Response:

These codes appear only when applicable; they are not necessarily identical to the similar codes used in the survey of 1989 enrollment.

"A" means all details (women, minorities, and foreign nationals enrolled in engineering programs) are missing from the response. There may be such students at the school but they will not show up in the tabulations for the specific population groups.

"B" means that details were provided for women only; details for minorities and for foreign nationals were not provided.

"F" means that details were provided for some, but not all, of the minority groups; that is, some minority data were missing.

"G" means that part-time students were not separated from full-time students; that is, part-time students were included with full-time students.

"J" means that details for part-time students were not available.

"M" means that no details for part-time for minority students were available.

"N" means that all students were listed under part-time; details by year and distinctions between part-time and full-time students were unavailable.

"P" means that some data were developed by EMC, by pro-rating accurate aggregates (such as information on all female enrollment) among the various programs at a school.

"9" denotes a substituted response using data originally submitted for Fall, 1989. Sixteen technology schools were treated with such data.

"8" denotes a substituted response using data originally submitted for Fall, 1988. Two technology schools were handled with this older data.

Examples: "TAR" code of SB: this is a publicly supported school with ABET-approved programs in both engineering and engineering technology. "TAR" code of RR9: this is a religious-affiliated school, regionally accredited, which has been handled with a substituted 1989 response. "TAR" code of NEG: this is a private, non-sectarian school with ABET-accredited engineering programs and part-time enrollments are included in full-time enrollment.

Program-Level Accreditation Codes:

These are used only in the tabulations for specific curricula:

"A" denotes ABET accreditation at the associate degree level.

"B" denotes ABET accreditation for the program at the bachelor's level.

"M" denotes ABET accreditation at the master's level (now only rarely used for programs with no B.S. equivalent).

"N" denotes programs with no ABET accreditation. In general, where program titles match across degree levels, higher-level offerings will be flagged with the corresponding lower-level code if such an ABET certification exists. However, many situations exist where this rule cannot be unambiguously applied. For example, we have generally labeled master's level programs in engineering mechanics as "N" for "no ABET accreditation" even when an ABET-approved BS curriculum in mechanical engineering is offered. If an undergraduate program in engineering mechanics existed, then a "B" code would have been used for any corresponding higher-level program. In general, ABET does not attempt to accredit graduate programs, and codes at this level (other than the rare "M" designations) are meant only to denote the existence in an institution of an ABET-approved undergraduate course with an identical designation.

Engineering Discipline Category Abbreviations:

AER = Aerospace and Related
ACN = Air Conditioning/Refrigeration/Heating
ARC = Architectural
AUT = Automotive
CHE = Chemical
CVL = Civil
CMP = Computer
CON = Construction
DRF = Drafting and Design
ELC = Electrical
ELM = Electromechanical
ELX = Electronic
ENS = Engineering Science (NOT in the sense of Pre-Engineering)
GNL = General Engineering Technology
INM = Industrial/Manufacturing/Engineering Management
MAR = Marine
MTL = Materials
MEC = Mechanical
MGN = Mining/Metallurgy/Welding
NUC = Nuclear
OTH = Others, including Biomedical, Agricultural, Ceramic, Environmental, and Petroleum

Readers should note that EMC's 1989 enrollment report inadvertantly listed an additional discipline category, SYS for Systems. Enrollment at two schools, totalling nine students, was affected. These data were accurate and did catch all systems engineering technology programs reported in that year.

MISCELLANEOUS NOTES

First-year enrollments are incompletely covered in these surveys, for a variety of reasons, including the fact that at many schools first-year students cannot declare a major field. The under-enumeration is consistent from one year to the next, so EMC's first-year time series data are reliable as an indication of trends, even though they fall considerably short of a total enumeration.

Women reported include minorities and foreign nationals. Ethnic minorities are limited to U.S. citizens or other permanent residents. "Foreign Nationals" are students in the United States on F-1 (student) or J-1 (exchange) visas, and exclude immigrants or other permanent residents. This year EMC requested, at the degree level but not at the program level, the number of ethnic minority students, and foreign national students in engineering programs, by sex. Most institutions provided this information; others had difficulties providing data to this level of detail. The results at the national level are summarized in a table in this introduction. As noted above, for detailed accounting see data on machine-readable floppy disks. For ordering information, see inside back cover.

CURRENT ENGINEERING MANPOWER COMMISSION PUBLICATIONS

NOTE: AAES has moved; see new address below. Custom runs of degree data are possible; call us for details. Our machine-readable products are provided on IBM-standard 5 1/4" floppy disks and include most, not but all, of the details available in EMC's printed reports. For more information, contact the AAES Manpower Studies Department.

ENGINEERS' SALARIES: SPECIAL INDUSTRY REPORT 1991 (forthcoming June 1991)

A detailed breakdown of engineering salaries according to type of industry, geographic regions, company size, employee experience, highest degree held, and supervisory status. Tables and graphs depict salaries in medians, quartiles, deciles and means.

member price: $169.00 non-member price: $287.50

PROFESSIONAL INCOME OF ENGINEERS 1991 (forthcoming June 1991)

An abridged version of the Special Industry Report. Details for salary differences by highest degree held are not included; tabulations are added on engineering compensation in local, state and federal government agencies.

member price: $59.50 non-member price: $97.00

SALARIES OF ENGINEERS IN EDUCATION 1990

Median, quartile, decile and mean salaries across 18 experience brackets for engineering faculty, by academic rank, contract types, and type of institution.

member price: $70.00 non-member price: $112.00

ENGINEERING AND TECHNOLOGY ENROLLMENTS, FALL 1990

A two-volume overview of the enrollment of students in engineering and engineering technology programs throughout the nation. Details by fields of study for specific schools and states, with added tabulations for women, minorities, and foreign nationals.

Complete set: member price: $120.00 non-member price $195.00

Separate volumes:

Part I: Engineering Enrollments: member price: $70.00 non-member price: $115.00

Part II: Technology Enrollments: member price: $70.00 non-member price: $115.00

Machine-readable data files for Lotus 1-2-3: member price $595.00 non-member price $795.00

ENGINEERING AND TECHNOLOGY DEGREES, 1990

A comprehensive report on recent engineering and engineering technology degrees in three volumes. Part I provides general statistics for schools and states on degrees in 40 engineering and technology disciplines. Part II provides similar data for awards to women, minorities, and foreign nationals. Part III includes detailed data for specific curricula.

Complete Set: member price: $140 non-member price: $230.00

Separate volumes:

Part I: by School: member price: $55.00 non-member price: $89.00

Part II: Minorities: member price: $75.00 non-member price: $115.00

Part III: by Curriculum: member price: $55.00 non-member price: $89.00

Machine-readable data files for Lotus 1-2-3: member price $595.00 non-member price $795.00

ENGINEERING MANPOWER BULLETINS

Concise, timely information on trends in engineering salaries, enrollments, degrees, women and minorities in engineering, other topics.

Full subscription year: member price: $66.00 non-member price: $110.00

Single copies: member price: $9.00 non-member price: $14.00

TO ORDER:

Member prices are available to members of AAES member societies, employees of Industry Affiliates, and educational institutions or firms that have participated in the study to be purchased. Special prices are available to subsidiaries and employees of EMC Sustaining Associates. Please include society affiliation and membership number, Industry Affiliate, EMC Sustaining Associate, or survey participant information with your order, if applicable. First class postage (U.S. domestic) is included in the purchase price. Foreign orders add 10%; check must be payable in U.S. funds. Institutional purchase orders are accepted, as are Visa and MasterCard charges (include account number, expiration date and signature). Orders charged to Visa and MasterCard accounts may be placed directly by phone (U.S. only) at 1-800-658-8897. Mail orders should be directed to the AAES Publications Department, Suite 608, 1111 19th St. N.W., Washington, D.C. 20036-3690.
